1000 Organic Villages Program

Vision and Mission

Fostering sustainable agriculture under **bio-eco-region** basis through development of organic farming which efficient in land and water use.

Outcome

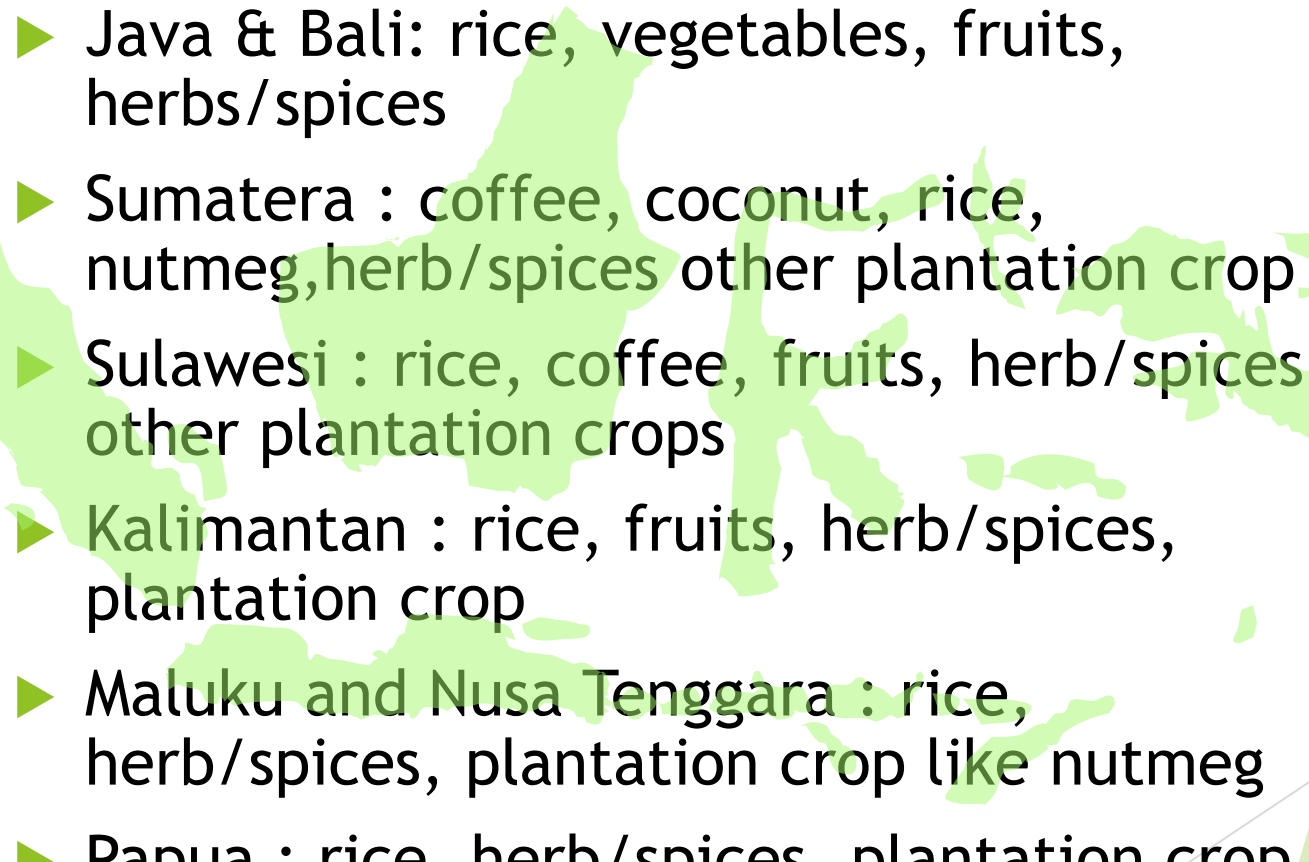

(Minimum) 1000 villages as production center of organic farming by 2019, and additional 1000 villages up to year 2024.

Implementing organic agriculture practices as realization of Act No.41/2009 about Land protection for Sustainable Food Production;

Target of Program until 2019

- ▶ 600 villages (region) as organic food crop production center, mainly rice → domestic and export market
- ▶ 250 villages (region) as organic horticulture production center: fruits and vegetables → mainly for domestic market,
- ▶ 150 villages (region) as organic plantation crops center (coffee, coconut, etc) → for export market
- ▶ Located in 22 Provinces

Area of Projects

- 
- ▶ Java & Bali: rice, vegetables, fruits, herbs/spices
 - ▶ Sumatera : coffee, coconut, rice, nutmeg, herb/spices other plantation crop
 - ▶ Sulawesi : rice, coffee, fruits, herb/spices other plantation crops
 - ▶ Kalimantan : rice, fruits, herb/spices, plantation crop
 - ▶ Maluku and Nusa Tenggara : rice, herb/spices, plantation crop like nutmeg
 - ▶ Papua : rice, herb/spices, plantation crop

Step of implementation

Preparation

- Selection of area
- Project assessment
- Project planning
- Technical & financial support

Implementation

- Training for farmers (farming, ICS)
- Organic farming practices
- Mechanization
- Post harvest & processing
- Market access
- Certification

Next step

- Replication
- Upscaling
- Extension market access

Support and facility

Organic seed production →
integrated 1000 seed village
program

Support fund : IDR 275 million
(USD 21,000) per villages per year

Capacity building of farmers

Organic input (compost, fertilizer)
& tools/machine

ICS development and Certification
cost

Packing and marketing

- ▶ No open data about how many villages/regions have been certified / failed / ongoing .
- ▶ Several project has got organic certificate both national and international market (EU, NOP) and start to export. Some other in certification process.
- ▶ Product : Rice, vegetables/fruits, coffee, nutmeg, ect.
- ▶ MoA & Ministry of trade, work with national exporter to buy and export the organic product to domestic and international market.

Output

Challenges on the Program

1000 Organic Villages

- ▶ No public information about implementation and progress of the program. Difficult for public to know, monitor and evaluate the progress and achievement.
- ▶ Top down project (wrong target, corruption issue), not well planning, farmer knowledge on OA, etc. Many local govt do not know this program implemented in their location.
- ▶ Limited budget, scattered area with limited infrastructure, no marketing strategy (off taker) → program not sustainable.
- ▶ Lack of knowledge and skill of government officers in the organic product flow (value chain) process → disruption in implementation and sustainability of the program

Thank You
